

# ACADEMY FOR THE ENVIRONMENT

## Why study the Environment?

There is an environmental dimension to almost every walk of life from engineering to economics, literature to limnology, and everything in between.

One of the fastest-growing career tracks in the world today, college graduates with environmental training are in high demand across the economy.

Environmental issues are no longer relegated to a narrow political ideology, but span the spectrum. Check out the reverse side of this brochure to see the wide variety of undergraduate environmental degree programs the University of Nevada, Reno has to offer you.
